

Clark Forklift Part

Clark Forklift Part - Performing worldwide, there are now 350,000 Clark forklifts and lift vehicles in operation, with in excess of 250,000 of those in service in North America. Clark has five major lines of lift trucks across the globe, making it one of the most expansive companies in the industry. Heavy duty trucks ranging from 1,500lb to 18,000lb capacities, dual fuel, gasoline, LPG, hand-driven trucks, narrow-aisle stackers and electric riders are some of their specialties.

Clark Totalift has 20 exclusive brands of lift trucks, with components covering more than 120,000 particular parts for all of its automated equipment. Your local Clark Seller is your total source for availability of all your parts requirements supplied by Clark Totalift.

Clark features a extraordinary Parts Supply team. The parts warehouses are conveniently located in Changwon, South Korea and Louisville, Kentucky to ensure exceptional service to both their customers and their sellers. For over 90 years, Clark has exceeded industry standards, being one of the most actively advancing producers. Driven to offer the highest level of value and service to our users, Clark remains on the cutting edge when it comes to enhancing efficiency and benefiting performance.

Worldwide, Clark has one of the most amazing supplier support networks. With over 550 locations globally, supplier representation in over 80 countries and 230 locations in North America, their high level of dedication to their customers predominates the materials handling industry.

By pioneering the operator restraint system protection feature, Clark proudly remains a leader of modernization in the industrial equipment and automated forklift industry. This exceptional commitment to safety is now a standard feature on every lift truck.

Clark's relentless goal to possess the No. 1 Quality system in the industry is proudly demonstrated by ISO 9001 - Clark, is the first lift truck manufacturer across the globe to be certified with the internationally accepted quality standard ISO 9001 for each and every one of their manufacturing plants. Additionally, the ISO 14001 Environmental Stewardship System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement allows Clark to be prepared for any number of environmental limitations, thus placing them in a prevailing industry position.

Clark has chosen the structure of "Lean Production" at all of its assembly facilities because this method is particularly economical and allows for minimal use of resources. Developed to ensure maximum efficiency, this system is designed to find and acknowledge the most effective ways for manufacturing plant management. Clark has completed this transition of its Korean plant. COPS which is Clark Optimized Production System, equally focuses on quality of product and services and manufacturing efficiencies.

Clark's product engineers and suppliers communicate together to perfect the effectiveness and brilliance of their products while minimizing costs. The contemporary value engineering program combines modern product growth and provides improved consumer support and service within the industry.
