Additionally, there are more than 90 independent dealers moving forklift equipment and materials handling equipment. This network allows Doosan Infracore America to aggressively compete in this competitive market. The lift truck product line remarkably includes 63 distinctive products consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion lift trucks. Capacities of these numerous vehicle versions vary from 3,000 to 33,000 lbs. All trucks are built in an ISO 9001 certified facility.

Doosan Infracore America is the fastest rising forklift and lift truck company in the North American marketplace, due to its outstanding level of product performance and their persistently high level of consumer support and service given to all Doosan Infracore Lift Truck users. The U.S. forklift division situated in Cleveland has a professional team experienced in Product Sales, Purchasing, Marketing, Logistical and Technical Support.

At first the domestic lift truck marketplace in Korea was an open import enterprise. Korea Machinery Co. Ltd. begun in 1960, to import fully assembled forklifts as part of a home-based equipment expansion project. Sales of these products were originally targeted to state-run firms, large scale businesses, and the armed forces. This ultimately led to a merger with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division begun business operations throughout Korea to overhaul and sell this heavy equipment. By 1978, a forklift manufacturing plant was successfully completed. Continuous technical instruction grew to become the new focus for improving quality and product development.

Home-based lift truck business for Daewoo started in 1967 and grew to an amazing 90% market share in Korea. By the 1980's, Daewoo's advanced technological enhancements combined with sales success placed them in a situation of significant expansion of their forklift business.

Caterpillar Industrial Inc. of the U.S. in 1981, proposed a cooperative venture project to help them in the highly competitive North American materials handling market. This joint-venture proved highly successful for Daewoo and their forklift product sales expanded greatly. In 1984, the company finished construction of a new facility to help in producing high end value-added goods for export. In 1993, the corporation had a international sales network and started exporting designs they had developed through in-house expertise, as an independent brand. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing growth opportunities into overseas markets.
